The Science Fiction Novels of Hugo and Nebula Award-Winner  
ROBERT J. SAWYER

SFWRITER.COM
Factoring Humanity was the best novel we read all year.”

— Jennifer Infuso, student, Science Fiction course York University

“My students love Sawyer’s books.”

— David DeGraff, Ph.D. Department of Physics and Astronomy Alfred University, Alfred, NY

“Informal advice to instructors offering our SF-fantasy course for the first time points to Robert J. Sawyer’s work as new, interesting, and most teachable. By merging science and literature, his hard SF appeals to both English students and those from other disciplines who take SF as a breadth course and for enjoyment.”

— Ian Lancashire, Ph.D. Department of English University of Toronto

Robert J. Sawyer is one of only eight people in history to win all three of the world’s top awards for best science-fiction novel of the year: the Hugo Award, the Nebula Award, and the John W. Campbell Memorial Award.

He’s also won the top SF awards in Japan (Seiun), France (Le Grand Prix de l’Imaginaire), Spain (Premio UPC de Ciencia Ficción), China (Galaxy), and Canada (Aurora).

Other honors for Sawyer include Analog’s Analytical Laboratory Award, the Crime Writers of Canada’s Arthur Ellis Award, and the Science Fiction Chronicle Reader Award, all for best short story of the year.

He holds an honorary doctorate from Laurentian University, and in 2008 was named one of the “30 most influential, innovative, and just plain powerful people in Canadian publishing” by Quill & Quire, Canada’s publishing trade journal.

For more information, visit his million-plus-word website (called “the most elaborate and interesting of any created by a Canadian writer” by The Oxford Companion to Canadian Literature) at:

SFWRITER.COM
“I took a survey at the end of my Religion in Science Fiction course, and *Calculating God* won out over titles like *The Three Stigmata of Palmer Eldritch*, *A Canticle for Leibowitz*, and *Out of the Silent Planet***.”

— Kate S. Kelley
Department of Religious Studies
University of Missouri

“As a teacher of Gifted and Talented students, I find Sawyer’s novels invaluable. His well-crafted plots weave together characters and themes to produce books that inspire very rewarding and passionate classroom discussions. My students have devoured everything he has written. It is without reservation that I highly recommend the use of Sawyer’s titles in your classroom.”

— John Michalko
Canandaigua Middle School
Canandaigua, NY

“I use *Calculating God* when teaching evolution to university-bound grade-12 students. I thank you for writing a book that I can use to challenge my students on the science, religion and philosophy front all at the same time.”

— Siobhan Watters
Ascension of Our Lord Secondary School
Mississauga, Ontario

“Rollback is chock-full of interesting discussion points about biotechnology, gender, aging, and what it means to be human. Highly recommended.”

— Fiona Kelleghan
Science Fiction scholar
University of Miami

“I could see *Hominids* being used in a utopian-literature course or to represent the utopian subgenre in a science-fiction course, and obviously in anthropology and sociology courses. This novel could also be used in a religion or philosophy course. Its examining and questioning of such issues as our belief systems, organized religion, and ecological responsibility allows for many teaching possibilities. Recommended.”

— Warren G. Rochelle, Ph.D.
Department of English
University of Mary Washington

“In the class I am taking, we are reading your brilliant novel *Hominids* and writing on the various social themes you have so realistically incorporated. I honestly did not read science fiction prior to this; now I am so excited to read more.”

— Jackie Nelson, student
Lexington Community College
Lexington, KY

CALCULATING GOD
Hugo Finalist!
Number One on the *Locus* Bestsellers list!
Top-Ten Canadian National Bestseller!
An alien comes to Toronto looking for scientific proof for the existence of God

“Unusually thoughtful SF.”
*Publishers Weekly*

“A thoughtful narrative that does not shy away from confronting profound questions. How can you go wrong?”
*The Globe and Mail*

“Smoothly combines ethical questions and comical dialogue in a highly absorbing tale.”
*Booklist*

ROLLBACK
Hugo Winner!

*HOMINIDS*

A parallel world in which Neanderthals survived to the present day and we did not

“Vintage hard SF, filled with ideas, both from science and from SF. I loved the read.”
*New York Review of Science Fiction*

“A novel that appeals to both the intellect and the heart.”
*Publishers Weekly*

“Real sense-of-wonder, clearly written, well-paced. The pages fly by. Full marks to Sawyer.”
*Interzone*

“Amazingly well thought out. Highly recommended.”
*Slashdot*

Tor Books, New York
ISBN 978-0-7653-4500-4

Tor Books, New York
ISBN 978-0-7653-4500-4
“Rather than exhausting themselves in trying to drum up student interest in contemporary problems in morality, professors should adopt a work like Sawyer’s *Frameshift*. It raises so many interesting problems in ethics and bio-ethics and it does so with all the suspense of a first-class thriller.”

— Joseph Novak, Ph.D.  
Department of Philosophy  
University of Waterloo

“I taught Robert J. Sawyer’s *Frameshift* and found it stimulated lively discussion around contemporary SF and hard science: chemistry, biology, and genetic research. My students were stimulated by the ethical and social issues raised by Sawyer’s questions of genetic testing, determination, and discrimination.

“Sawyer’s website at [sfwriter.com](http://sfwriter.com), which provides essays, links and reading questions, also focuses attention on the science issues in this SF thriller.”

— Nancy Johnston, Ph.D.  
Department of English  
Ryerson University

“Sawyer’s books are incredibly thought provoking. My major and passion is Canadian history, and I’m elated to see that books containing much Canadian content have had such world-wide acclaim.”

— Kirk N. R. Graham  
English/History double-major student  
Dalhousie University

“Rather than exhausting themselves in trying to drum up student interest in contemporary problems in morality, professors should adopt a work like Sawyer’s *Frameshift*. It raises so many interesting problems in ethics and bio-ethics and it does so with all the suspense of a first-class thriller.”

—I’ve used Sawyer novels in courses on science fiction, the history of science, and religion since 1994 and they’ve proved to be among the most popular and effective texts in my reading lists.

“Most recently, I’ve taught *Mindscan*, in which Sawyer explores rifts between reason and feeling, between science and religion. He ponders — as the story unfolds on Earth and on the Moon, in the courtroom and in the human heart — the meaning of embodied personhood, of the soul in the machine, of future transformation.

“My students come from a wide variety of ethnic, cultural, linguistic, and religious backgrounds, and from across the arts and science spectrum. All respond positively to Sawyer’s books, and they’ve stimulated exceptional classroom discussions.”

— Rev. Paul Fayer  
Historian of Science and Religion  
York University

“Richly informed by current interdisciplinary research in the burgeoning field of consciousness studies, and alive with provocative speculation of its own, *Mindscan* is a heady brew of hard SF, blended with enough comedy, romance, and adventure to appeal to a wider audience, as well.”

— Philip Snyder  
Professor of English and Philosophy  
Monroe Community College, Rochester, NY

“We studied *Mindscan* in an honors seminar called Rhetoric of the Posthuman. We all loved it. Your novel definitely turned me on to science fiction — thanks for introducing me to the genre!”

— Meghan Juuti  
Fourth-Year English student  
Laurentian University

“WWW: Wake

Hugo Finalist!  
Aurora Winner!

The World Wide Web wakes up

“Wildly thought-provoking thematic diversity and profundity.”

*Publishers Weekly*  
(starred review, denoting a book of exceptional merit).

“Sawyer’s approach to machine consciousness and the Internet is surprisingly fresh.”

*Booklist*

“Sawyer’s erudition, eclecticism, and masterly storytelling make *Wake* a choice selection.”

*Library Journal*

Ace Books, New York  
ISBN 978-0-441-01853-6  
US$7.99

Penguin Canada, Toronto  
ISBN 978-0-14-305630-0
